NEWTON ABBOT.

TELEPHONE No. NEWTON ABBOT 5901

ANNUAL REPORT - 1970

Teignmouth Port Health Authority

I submit the Annual Report for the Teignmouth Port Health Authority for the year ended 31st December, 1970.

The year was once again a record for the berth tonnage, which rose from 152,000 to nearly 167,000 tons and also in respect of the number of ships which rose from 602 to 651.

In my last Report, I referred to the tremendous difficulties in ensuring that no unauthorised animals are brought ashore from the large number of ships, which visit the Port. In fact, on one occasion last year a ship arrived from Spain with a donkey and a number of dogs aboard. The donkey was used to transport the Captain to and from the local public house, before the fact was brought to our attention. Unfortunately, a prosecution was not possible as reference had already been made to the Veterinary Authorities and the position had not been made clear to the Captain.

Public Health Inspectors, the Police and Officers of the Customs and Excise Authority are now well aware of the dangers of importing animals from the Continent and take whatever measures they can to see that animals are not landed at Teignmouth. As I have said before, the policing arrangements cannot be considered to be fool proof.

Port Medical Officer

June, 1971.
